

# PowerChute™ Business Edition v9.2

## Release Notes

## Introduction

The PowerChute Business Edition Release Notes have the following sections:

- [What's new in this release](#)
- [Known Issues](#)

## What's new in this release

The following features are new to PowerChute Business Edition v9.2:

- **New SMTP Port option** in PowerChute Email Settings screen.  
A new option has been added to the PowerChute user interface to specify the SMTP port from which mail is sent.
- **Security enhancement** - fix for POODLE: SSLv3 vulnerability (CVE-2014-3566).  
JRE 1.8u31 is now bundled with PowerChute Business Edition v9.2. SSLv3 is disabled by default.
- **Note:** SNMP is enabled by default. It can be disabled in SNMP Settings on the Web Agent, or for certain Agents, it can be disabled in the Console.

## Known Issues
