1.0 Executive Summary

The StruxureWare™ Management Software Configuration Suite is a collection of software configuration services designed to support the implementation of your data center management software solution. The customer will have the option of selecting varying quantities of mandatory and optional services to support the data center management application chosen in the solution. StruxureWare Management Software Configuration Suite options are listed below:

- StruxureWare Management Software Configuration Base – Mandatory service
- StruxureWare Central Software Configuration – Optional
- StruxureWare Operations Software Configuration – Optional
- StruxureWare Capacity Software Configuration – Optional
- StruxureWare Post Configuration Insight - Optional

Each of the individual service option will have activities unique to the specific application. The details of the individual activities will be defined in the respective Statements of Work (SOW). The individual SOW will outline the service objectives associated with the specified activity. In addition the service objectives for the individual service SOW will include the Features & Benefits, Details of Service, Assumptions, Deliverables, Exclusions, Scope of Responsibility, Project Work Details, Pricing and Terms & Conditions.
